

Abalto

Consider it Solved... Consider it Done...

Quarterly Newsletter 13 Nov 2016

*The latest news and information about our activity to our **Customers, Business Partners and Employees.***

Abalto consolidated its position as System Integrator by doing detail design as specialist local engineering design consultants subcontracted to **WPAI** for **PDO** Birba Gathering Station.

Abalto enters in Operation Technology (OT) Cyber Security as “Authorised Re-Seller” in Oman for **Wurldtech** www.wurldtech.com a GE Digital company www.ge.com/digital/

As part of portfolio diversification business development activities kicked off for the **Abalto Renewables** division with budgetary proposals submitted to clients on **Wind Solar** solutions.

Highlights

Above three updates are the main highlights for 2016, where **Abalto** won the System Integrator **SI** specialist subcontractor role in **WPAI** as an **approved** Local Engineering Design Consultant **LEDC** for BGS Control System Upgrade Project of **PDO**.

Responding to increasing cyber threats to the **Operational Technologies** systems for Critical Infrastructures, **Abalto** has brought further expertise by introducing **GE Wurldtech** in Oman acting as their Authorised Re-Seller. Multiple proposals are submitted in Upstream, Downstream, Power and Water sector for which outcome is expected by end 2016 or early 2017.

Abalto Renewables division is busy in identifying potential clients who are interested in direct **Steam Generation** through **Solar Parabolic Reflectors** and Electricity Generation through **Vertical Axis Wind Turbines** as a complimentary source of power assuring day and night operation for plants using these complementary technologies.

Presentations have been made and budgetary concept proposals submitted with upstream clients to provide Cyclic Steam Injection for EOR.

Our traditional area of expertise has now a strong pillar of EI&C Construction which is complementing Oil & Gas Commissioning and System Integration.

Our strong **HSE** performance during last one year of multiple site works without any **LTI** is a strong source of motivation for **Abalto** family.

We intend to induct additional Omani talent as soon as some of the projects in the pipeline are awarded to us. Omani talent in E&I or even fresh graduates are encouraged to visit abalto.com for any available positions.

Under **ICV** initiative **Abalto** is committed to play its part of **EI&C** Construction support for **LIWA** Project of **ORPIC** in Sohar through **CCJV, Maire Technimont and GS Mitsui**.

New Partnership

After forging partnerships with **CIM, GE Wurdtech, Descon** www.descon.com and **Hengju Renewable Energy**, discussions are ongoing with other potential principals to further enhance our core capabilities. www.upstreamonline.com

Major ongoing projects

- Detail Design of **BGS** as System Integrator with **WPAI** on **PDO** project
- Instrument Construction Contract for **additional units** and finalization of existing units at **ORPIC SRIP**
- Commissioning support for **ORPIC SRIP** through **Petrofac**
- Commissioning of **Qatar Petroleum** project at **Dukhan**
- Commissioning of **Qatar Petroleum** project at **Messaied**
- **HFE** of **SNDC2** on behalf of **L&T** for **PDO**
